RE: NUMBERING ADMINISTRATION OVERSIGHT WORKING GROUP WORK PRODUCT COMBINING THE NORTH AMERICA NUMBERING PLAN ADMINISTRATION AND POOLING ADMINISTRATION FUNCTIONS INTO A SINGLE TECHNICAL REQUIREMENTS DOCUMENT

Dear Honorable Kavulla,

Pursuant to FCC Order Number 18-88, please find attached the proposed combined Technical Requirements Document (TRD) for the North American Numbering Administrator (NANPA) and the Pooling Administrator (PA) functions. The proposed TRD contains a single, unified set of functional and system interface requirements for a new NANPA entity to fulfill the current functions of the NANPA, PA and Routing Number Administrator (RNA) collectively under a single contract, as contemplated in the Order. The proposed TRD contains a number of requirements, highlighted in yellow, that are enhancements to existing functionality or new functionality requirements, that are not deployed in the current separate NANPA, PA and RNA systems today.

The combined efforts of the Numbering Administration Oversight Working Group (NAOWG) and its Contract Oversight Subcommittee (COSOC) have produced this proposed TRD for distribution to and for review by the North American Numbering Council (NANC). The NANC is expected to consider and vote on whether to approve the proposed TRD (subject to any amendments the NANC may consider appropriate) at its September 13, 2018 meeting.

Following the review and vote among the NANC members, I am confident that the efforts the groups put forth will satisfy the NANC's requirement to submit the proposed TRD to the Chief of the Wireline Competition Bureau by September 24, 2018.

If there are any questions, please let me know.

Best Regards,

Commissioner Paul Kjellander
President, Idaho Public Utilities Commission
